### **BMC Validation Plan**

- The order the team will validate the Business Model Canvas (BMC) is as follows:
  1. Customer Segment
  2. Value proposition
  3. Channels
  4. Customer relationship
  5. Revenue Streams
  6. Key Resources
  7. key Activities
  8. Key partnership
  9. Cost structure
- The reason for considering this order is that the different sections are interconnected in a way -
  - By starting with Customer Segments and Value Propositions, the team can ensure that the subsequent components are built on a solid understanding of customer needs.
  - Validating Channels and Customer Relationships together allows the team to refine their understanding of how to reach and serve the identified customer segments.
  - Once customer-related elements are validated, the team can focus on the business's sustainability and feasibility. Revenue streams and key resources are interconnected and should be aligned with the validated customer needs.
  - By validating Key activities, partnerships, and cost structure last, the team can ensure that these elements are built on a solid foundation of customer understanding and revenue generation.
- Action items and validation for each section in BMC

|  | partners who can enhance the business model. | <ul style="list-style-type: none"> <li>● Conduct research on resource availability and costs.</li> </ul> |  |
|--|----------------------------------------------|----------------------------------------------------------------------------------------------------------|--|

- The responsibilities are divided amongst the team because of the following reason:..
  - Aarya has effective communication and collaboration skills required to interact seamlessly with customers during interviews. She can collaborate with other teams and articulate value propositions in a compelling manner. So she is an apt person who can handle different customer segments and value propositions.
  - Robert has a keen understanding of the work that goes behind the scenes. He understands the dynamics and necessities of businesses and their partners. With some simple research he is able to dissect the resources needed for a specific business run, as well the important key partners to engage in talks with. For this project, he will be a key asset to maximize our opportunities and our planning ahead of the production.
  - Kamalendu has previous project management skills which will be very beneficial for our business model. She is adequate at planning, organizing, and executing key activities in the projects.
  - We need someone who is good at managing costs and who can maximize profitability. Nidhi is good at evaluating scenarios and considering the impact of strategic decisions on cost and revenue.
  - Adrien is a very good communicator and works very well with people. These skills are extremely useful when conducting interviews. That, along with good decision making skills, makes him the perfect choice to conduct interviews and then define and identify channels and customer relationships.
