# Why Grocer Ai?

- Time-consuming
- Struggle to find the best deals
- Lack real-time information
- Unaware of all the shopping options available

# Value Propositions

Convenience

Cost Savings

Wide Range of Choices

# For Whom?

Budget-Conscious  
Consumers

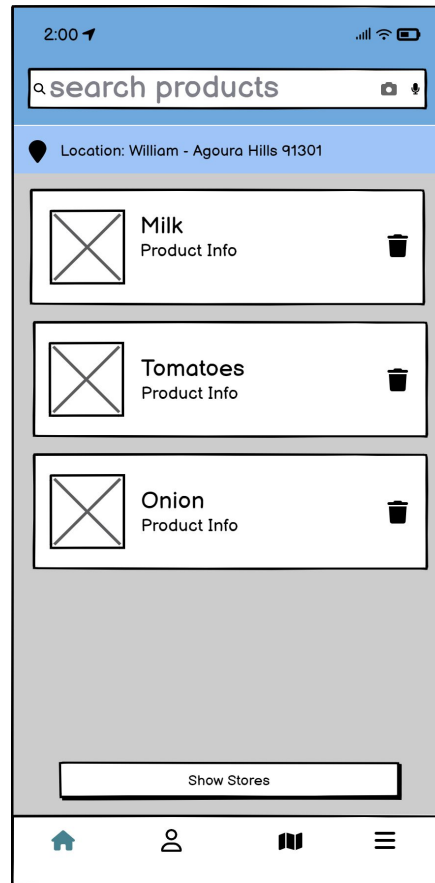

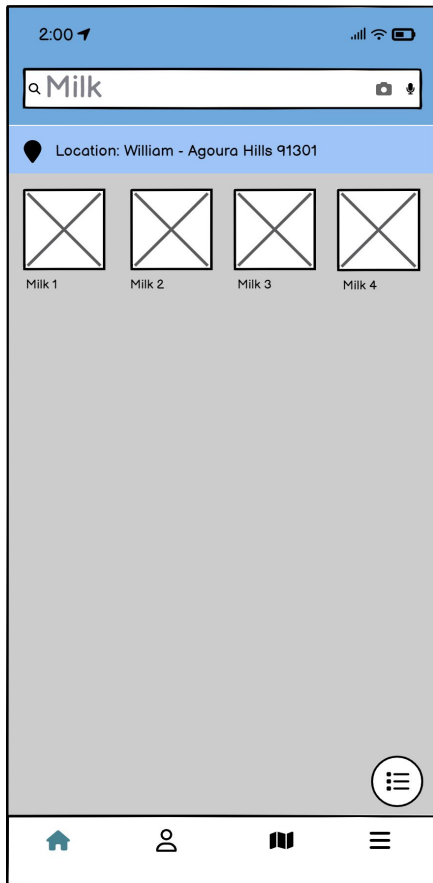

Busy Professionals

Small Business  
Owners

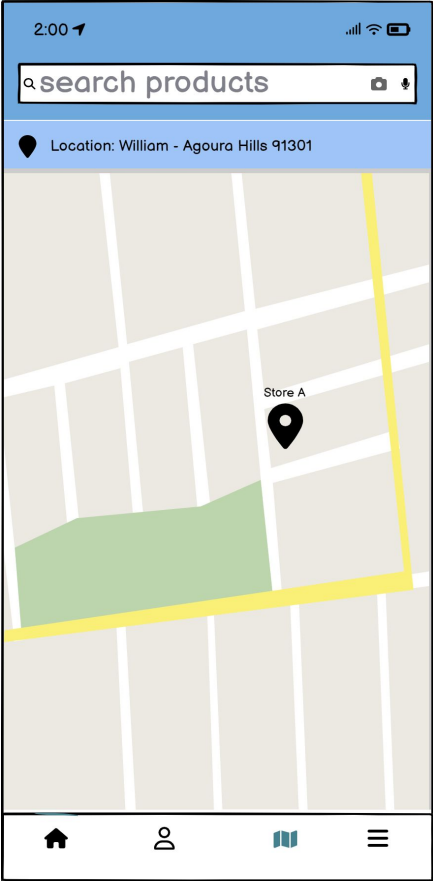

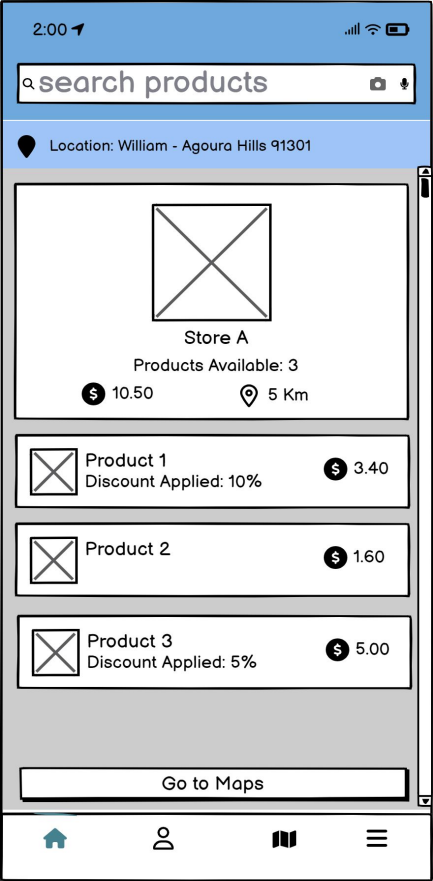

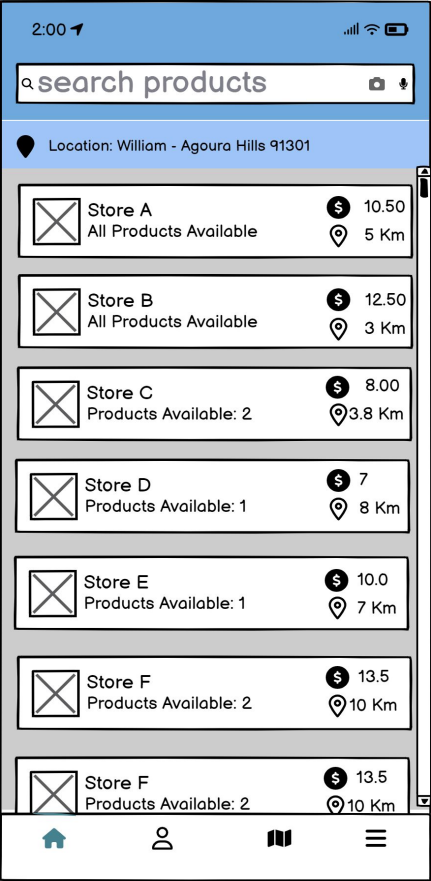

Senior Citizens

# Grocer Ai

# Market Competition

- **Price Comparison Websites and Apps:** These platforms allow consumers to compare prices for products across various retailers. Eg: ShopSavvy, PriceGrabber, and Honey.
- **Retailer-Specific Apps:** Many large retailers have their own apps offering price checking, in-store navigation, and personalized discounts. Eg: Walmart, Target.
- **Grocery Delivery and Management Apps:** Apps like Instacart or Walmart Grocery offer the convenience of comparing prices.
- **Emerging Tech-Based Solutions:** Apps using AI and ML for personalized shopping experiences or AR for virtual try-on features can be indirect competitors.

# Grocer Ai's Moon-Chart

Here we have Grocer Ai's moon chart which includes 4 of it's top competitors.

| Grocery Store Applications | Subscription                                                                      | Reliability                                                                       | Speed                                                                               | Ease-Of-Use                                                                         | Social Connect                                                                      |

# Checkpoint - Customer Interview

- Customer Interview in progress-interacted with customers on how the idea sounds and what are their suggestions and feedback on this.
- Planning to launch a MVP and continue interview to get comments on the UI Interface.
- Some of the suggestions

Participants responded positively to the concept of 'Grocer Ai', highlighting particular enthusiasm for features such as real-time price updates and the ability to compare prices across multiple stores.

"Another key insight was the desire for a personalized shopping experience, suggesting that our app should include customizable shopping lists and alert features for price drops on frequently purchased items."
